

PLATE XXVII.

Figs. 1-10. PENTACRINUS ALTERNICIRRUS, n. sp.

	Diam.	Page
Fig. 1. Portion of stem containing two nodal joints; interrarial view,	x 3	270
Fig. 2. Lower or syzygial face of a nodal joint which bears three cirri,	x 6	323
Fig. 3. The corresponding face of a joint bearing only two cirri,	x 6	323
Fig. 4. The ambulacral skeleton of a pinnule; from above,	x 15	323
Fig. 5. The end of a pinnule; from the side,	x 12	80
Fig. 6. The arm-groove and brachial ambulacrum,	x 12	80
Figs. 7, 8. Inner and outer sides of an arm, bearing a pinnule-cyst of <i>Myzostoma deformatior</i> , von Graff,	x 3	324
Figs. 9, 10. Inner and outer sides of an arm, modified by a cyst of <i>Myzostoma pentacrini</i> , von Graff,	x 3	324

Figs. 11-13. PENTACRINUS NARESIANUS, n. sp.

Fig. 11. The ambulacral skeleton of a pinnule; from the side. Some of the covering plates have been removed,	x 15	78
Fig. 12. The same; from above,	x 12	78
Fig. 13. The brachial ambulacrum; from above,	x 12	78
