

PLATE I.

- |   | PAGE |
|---|------|
| Figs. 1–20. <i>Cyclaspis australis</i> , n. sp., . . . . .  | 12   |
| Fig. 1. Young male, seen from the left side ; magnified about fifteen diameters.  |      |
| Fig. 2. Same, seen from above.  |      |
| Fig. 3. Young female, seen from the right side.   |      |
| Fig. 4. Ocular lobe, seen from above.   |      |
| Fig. 5. Antennal segment, viewed from below, together with antennulæ ( $\alpha^1$ ),<br>antennæ ( $\alpha^2$ ), and anterior lip (L). |      |
| Fig. 6. Outer part of an antennula; more highly magnified.  |      |
| Fig. 7. Posterior lip.  |      |
| Fig. 8. Mandibles, seen from the front.   |      |
| Fig. 9. Maxilla of first pair.  |      |
| Fig. 10. Maxilla of second pair.  |      |
| Fig. 11. Left maxilliped, together with the corresponding part of the branchial<br>apparatus, seen from above.                        |      |
| Fig. 12. Left maxilliped, isolated, seen from below ; more highly magnified.  |      |
| Fig. 12a. One of the marginal spines from carpal joint of same maxilliped ; highly<br>magnified.                                      |      |
| Fig. 13. Terminal lamella of the exopodite of same.   |      |
| Fig. 14. Gnathopod of first pair.   |      |
| Fig. 15. Gnathopod of second pair.  |      |
| Fig. 16. Leg of first pair.   |      |
| Fig. 17. Leg of second pair.  |      |
| Fig. 18. Leg of third pair.   |      |
| Fig. 19. Leg of fifth pair.   |      |
| Fig. 20. Last caudal segment, together with the uropoda, from above.  |      |
| Figs. 21–23. <i>Cyclaspis pusilla</i> , n. sp., . . . . .   | 19   |
| Fig. 21. Adult female, seen from the right side ; magnified about twenty-six<br>diameters.  |      |
| Fig. 22. Same, seen from above.   |      |
| Fig. 23. Ocular lobe, seen from above.  |      |
| Figs. 24–26. <i>Cyclaspis exsculpta</i> , n. sp., . . . . .   | 20   |
| Fig. 24. Anterior division of a female specimen, seen from the left side ; magnified<br>about twenty-six diameters.                   |      |
| Fig. 25. Same part, viewed from above.  |      |
| Fig. 26. Ocular lobe, viewed from above.  |      |
