¹ A synonym of *Autonoe plumosa*, Boeck, according to the Museum Normanianum, 1886.

² *Autonoe longipes*, Bruzellus, 1859.

³ *Gammarus macronyx*, Liljeborg = *Protomedeia fasciata*, Krøyer, 1842.

⁴ This is named *Autonoe versiculata* in the Museum Normanianum, 1886, so that the priority of the genus *Lembos* over *Autonoe* comes in question.

⁵ Boeck in 1870, but not in 1876, makes *Microdeutopus websterii*, Sp. Bate, a synonym of *Protomedeia fasciata*, Krøyer. It is named "*Autonoe Websteri*" in the Museum Normanianum, 1886, in regard to which the remark made in the preceding note will apply.

⁶ On page 384, line 24, for *nubeculatus* read *nubeculatus*, and on page 371, line 11, for *nubitatus* read *nubilatus*.
