¹ On p. 254, line 41, for *quadrimanus* read *quadrimana*.

² On p. 254, line 40, for *rectimanus* read *rectimana*.

³ Adams and White, in the synonymy of *Rhabdosoma armatum*, give "*Oxycephalus armatus*, M.-Edw., Crust. III. p. 101. pl. 30. f. 10, copied. (Tab. XIII. Fig. 8.)," but their previous statements and the lettering of Tab. XIII. alike show that the words "pl. 30. f. 10, copied. (Tab. XIII. Fig. 8)" should have been referred to the independent species, *Oxycephalus piscator*, M.-Edw.

⁴ On p. 353, lines 6, 7, for *Paleocrangon problematicus* read *Paleocrangon problematica*. The carboniferous *Paleocrangon* referred to by Claus, see p. 508, is perhaps a distinct genus from Schauroth's.
